Grow Your Own BLUEBERRIES

Pick Them Fresh Off The Bush

Cultivated Blueberries are hardy shrubs of rare beauty; they are doubly valuable because they are fruitful and ornamental throughout the entire year. Just loads of delicious berries. 

Every home garden, no matter how small, has room for at least a few of these Blueberry plants. It takes only a few plants to produce all the berries an ordinary size family will need. As a commercial proposition it is one of the most profitable fruits to grow. There is a big market for these delicious Blueberries; they make good money in a very short time, you can begin picking the second or third season after planting. They grow in big clusters, see actual photograph of a four-year old plant at right, producing 3000 to 5000 quarts per acre, are easy to harvest, thornless. Plants last a very long time.

Blueberries are also ornamental shrubs of rare beauty. They may well be used in association with their close relatives, Laurel and Rhododendron. In pleasant contrast to the rich evergreen masses of the latter, Blueberries give lightness grace and color. Plant them in rows, in clumps on the lawn or in the shrubby border. A hedge of Blueberries is both profitable and ornamental, a delight to look upon and to care for.

Choose a moist piece of ground easily supplied with moisture during dry summer months—it should not at any time become water-logged. Plant in full sun if possible; they will also do well in partial shade. Be sure the soil is acid. Cultivate shallow, not over 2 or 3 inches deep, so as to leave the roots undisturbed. We will send full instructions for preparing the soil, taking care of the plants, mulching, etc., on request.

We want you to again look at the above plant. See how full of fruit it is, then look how large the berries are in the basket, then use your imagination to picture these bushes in your own yard or field full of these berries.

Description of Varieties

BURLINGTON. This is the newest variety named. Berries are excellent flavor, very large size and quite uniform. An unusually good keeper. Bush is medium high and crops heavily, and later in the season than other late varieties. **Add 10c per plant additional for plants of this variety.**

CABOT. The earliest variety named. Plants seldom exceed three feet in height and make a broad low bush. The color of the new growth in winter is a light red over olive. The large berries have a delicious sub-acid flavor.

CONCORD. The bush is of upright habit and at maturity exceeds six feet in height. The young growth is bright red in winter. The berries are large, frequently reaching three-quarters of an inch in diameter. They usually ripen a few days earlier than Rubel and are fine in flavor and appearance.

JERSEY. The bush is of vigorous habit and grows very large. The winter color of the young growth is a light red over golden brown. The berries are among the very largest, light blue, and ripen about the same time as Rubel.

RANCOCAS. The bush of slender, vigorous, upright habit rarely surpasses five feet in height. The winter twigs are a dark red. The berries are somewhat larger than those of Rubel and begin to ripen several days later.

RUBEL. A vigorous, productive variety. Well developed bushes stand six feet high and the winter color of the young wood is a rich red. The large berries of fine color are usually ready to pick the first week in July.

Prices of Blueberry Plants	Each	10	100
6 to 12 in., 2 yr.	\$1.40	\$10.00	\$75.00
12 to 18 in., 2 yr.	1.85	13.50	100.00
18 to 24 in., 3 yr.	2.75	20.00	150.00
2 to 3 ft., 4 yr. Bearing size	3.25	30.00	275.00

Order at least three varieties for pollination purposes. We will gladly suggest varieties suited to your needs if you will tell us how many and for what purpose they are wanted.

The Tingle Nursery Co., Pittsville, Md.

Plant This Fall Everblooming Rose Bushes

BLOOMS FROM EARLY SUMMER TO FROST
FREE BLOOMING, FRAGRANT, COLORFUL

Plant Everblooming Roses this fall. Two-year, hardy, field-grown plants, heavily branched, well rooted. Should bloom all next summer.

No. 1 size, \$1.00 each, 10 or more @ 95c each.
Pink Dawn. Delicate blushing pink with orange base.
McGredy's Yellow. Buttercup yellow. Strong grower.
McGredy's Ivory. Beautiful soft white, yellow base.
General McArthur. Dark red. Giant double blooms.
Night. Deep velvety red with black shading.
Talisman. Glamorous two-tone rose, red-orange, gold.
Christopher Stone. Bright red spicy fragrance.
Poinsettia. Flaming, clear scarlet copper. Good grower.
Contrast. Orange pink with cream reverse, bronze.
Golden Sastago. Stately golden blooms. Reliable.

Forsythia Ovata (Korean Goldenbell)

The earliest Forsythia to bloom. A very hardy recently introduced species with clear primrose-yellow flowers. 18 to 24 in. @ 65c each.

Quintuplet Apple

Five Leading Varieties on One Tree

The Famous 5-N-1

Here's the opportunity for those with limited space to have five mighty desirable varieties of Apples, all budded on one tree for a little more than the cost of one tree. Requires only a 25-foot space when fully grown. Each tree is budded to Yellow Transparent for first early, Anoka for second early, Red Jonathan, Red Delicious and Yellow Delicious for fall and winter.

Price: No. 1, 2-year-old trees, \$3.25 each

Gable's Hybrid Azaleas

These hybrids have been made in the effort to produce a hardier strain of the Japanese type of azalea in better form and color than has heretofore been available in hardy varieties. All have lived and flowered in the open field where they have withstood temperatures of twenty degrees below zero and more in the past few winters with only negligible injury.

Prices: 2-yr. old plants, 5 assorted your selection \$5.00, 10 or more your selection @ 90c each.

Cameo. Tea-pink, late, double semi-evergreen. Long season.
Cameron. Mulberry red, dwarf, semi-evergreen. Midseason.
Claret. Early, large, wine-red. Dwarf, semi-evergreen. Profuse bloomer.
Corsage. Dwarf, semi-evergreen, light orchid. Showy blooms.
Elizabeth. Late, rosy-orchid. Best evergreen foliage of all.
Fringed Beauty. American Beauty red. Late, to 5 feet. Deciduous.
LaLumiere. Blazing red, midseason. Compact evergreen bush.
Louise. Dwarf evergreen bush. Double salmon-pink, late midseason. Most charming.
Miriam. Early deep pink. Profuse bloomer. Showy Deciduous.
Royalty. Rich bright purple. Dwarf evergreen. Midseason.
Springtime. Very early bright clear pink. Profuse, showy. Deciduous.

We will make from your list of varieties. Embossed Zinc Labels, one-half inch wide at seven cents each. These labels will permanently identify your plants.

You Should Grow The Rare Franklinia FRANKLINIA ALATAMAHA

This exquisite fall flowering tree was brought in 1777 from the banks of the Alatamaha River in Georgia to Bartram's garden at Philadelphia. John Bartram, recognizing its extraordinary beauty and value, named it in honor of his life-long, dear friend, Benjamin Franklin.

The original grove of Franklin trees was again visited in 1790, but from that day to this no one has seen these trees growing in the wild though many expeditions have searched the banks of the Alatamaha for it.

Franklin's tree is rarely beautiful in detail and marvelous in landscape effect besides blooming at a season when few shrubs or trees are in flower.

The slender trunk and graceful branches are so muscular and sinewy in appearance that one almost expects motion as in a greyhound's satiny skin. The bark is smooth and dark gray, with wavering lengthwise markings of lighter color.

Each twig develops at its tip a cluster of buds of graduated size, like overgrown greenish pearls. Early in August the largest of these attain the size of marbles. Then the guard petal folds back, still retaining its firm spherical form. From its shelter emerge four other petals, satiny, snow-white elaborately frilled and pleated. The snowy, frilly chalice, three inches in diameter, holds a sumptuous mass of orange gold stamens and breathes forth a delicate, balmy fragrance.

Each flower lasts two or three days and then drops cleanly. There is a constant succession of bloom till hard frost. We frequently get the unusual effect of a tree clad in crimson autumn foliage and abundantly starred with white flowers.

The Franklinia begins blooming when not more than three or four feet high. Young trees under favorable conditions increase in height a foot or more each season. Specimens thirty feet high are known.

Franklinia prefers full sun and has proven entirely hardy about New York and hardy in favorable locations about Boston. It is an especially desirable tree for the small intimate garden, loved and lived in. It is a charming lawn tree and the grass may be allowed to grow closely about its trunk. It also thrives when planted by pools, lakes and streams. Its light elegance of form and color contrasts exquisitely with the dark green of conifers.

Low prices as follows: 12 to 18 in. @ \$1.50 each, 18 to 24 in. @ \$2.50 each, 2 to 3 ft. @ \$3.00 each, 3 to 4 ft. @ \$4.00 each, 4 to 5 ft. @ 5.00 each, 5 to 6 ft. @ \$7.50 each.

Tree Peonies

Because of their novelty and great beauty the Tree Peonies are rapidly becoming one of the most desired plants. They bloom earlier than ordinary Chinese Peonies and their flowers are of immense size. Note our low prices for these plants. In pots and can be safely moved at any time.

ARCHIDUC LUDOVICO. Enormous flowers, flesh pink, turning soft lilac; free flowering. \$3.00 each.
BANKSI. Semi-double; pale lilac; very free blooming. \$3.00.
REINE ELIZABETH. Large perfect double flower of vivid salmon-rose. \$3.75 each.
SOUV. DE MAXIME CORNU. Crowded and wrinkled petals of a deep yellow, heavily shaded orange-salmon. \$9.00.

You Can Now Grow Chestnuts

With the Blight Resistant Chinese and Japanese Varieties

Most people know that a terrible blight has befallen our native Chestnut tree, but many do not know that the Chinese and Japanese species are resistant to this blight. These foreign Chestnuts also bear when very young. We had nineteen burrs averaging three nuts each on a tree 40 inches tall. These trees are not as tall growing as was our American species, but grow more spreading, making a round top tree.

There is very much interest in these foreign species and we are very fortunate in having a nice supply to offer this season. The variety we now have is the Chinese, Mollissima. 2 to 3 ft. @ \$2.50 each, three for \$6.00, 10 for \$18.00.

Hardy Pecan

Grown from Stuart seed. Hardy and sturdy as an oak. A splendid and rapid growing shade tree that will reward you with bushels of fine quality nuts. The kernels are plump and of fine quality. Nuts are large and easy to crack. 6 to 12 in. plants, 3 for \$1.00, 10 for \$2.50 100 for \$20.

Large Fruiting Black Walnut

Our large fruiting black walnuts are our own strain, grown on one of our farms, nuts are full and meaty, heavy yielders 12 to 18 in. 3 for \$1.00, 10 for \$2.50, 100 for \$20.00.

WATERLILY MAGNOLIA

This new Magnolia was named "Waterlily" on account of its resemblance to a waterlily and its sweet fragrance. Bushy and twiggy somewhat like Stellata. Bears a great profusion of flowers a little later than Stellata. Flowers are well placed on ends of branchlets measuring from 4½ to 6 inches across, consisting of three to five layers of petals averaging from 20 to 32 to a flower. Flowers are blush-pink, buds flesh-pink, fading to white, some seasons the flowers open nearly pure-white. Very popular wherever seen. 2 to 3 ft. bushy plants @ \$10.00 each.

Enkianthus Campanulatus

This charming Oriental should be in every garden. Masses of bell-shaped flowers, yellowish or pale orange, veined darker red on pendulous stalks in May. One of the handsomest ericaceous plants; foliage turns brilliant red in autumn. Grows 8 to 10 ft. tall. 12 to 18 in. @ 75c each.

Oakington Ruby Rose

A new dwarf rose, growing about 12 inches tall. Its double flowers are deep crimson in bud and open to a rich ruby-carmine, which is maintained until the petals fall. Hardy, not fussy about soil, and blooms all summer. 75c each.

Old English Boxwood

Possibly no other evergreen shrub has been so much used for marking boundaries of formal gardens, to outline flower beds, for low hedges, and for other ornamental purposes. This is the kind you will find in the formal gardens at Mt. Vernon (Washington's home). We offer 4 to 6 in. size @ 3 for \$1.00, 12 for \$3.50, 100 for \$27.50.

Viburnum Burkwoodi

The Gardenia Scented Snowball. An improved Carlesii with deliciously fragrant, waxy pink flowers produced in early spring. Of compact, bushy habit, attaining a height of 4 feet and spreading to a width of from 5 to 6 feet. A real aristocrat for the small garden. 18 to 24 in. @ \$2.00 each, 3 for \$5.00.

THE TINGLE NURSERY CO., PITTSVILLE, MD.
